## EXPERIENCE

### Co-founder, Virtio Ltd

Prague, Czech Republic — Sep. 2010 - Present

<https://virt.io/> (currently available only in Czech language)

Virt.io was founded as a hobby to fill my free time - mostly driven by my love of linux systems and of discovering new and interesting technologies. It has become to a regular business. Main purpose of this project is a virtual server hosting.

### Accomplishments

- Dozens of customers without marketing or advertising.
- Among customers are sole traders, [small companies](#) up to middle sized [companies](#).
- Virtual servers managed by a system based on the Ruby and RoR - <https://admin.virt.io/about>
- System that does not consume much of my free time - it is almost self-sufficient (automated).
- Created other web applications built around the core of the project - customer system, web presentation, backup system - all using RoR or pure Ruby. Interconnected through REST API and connected to 3rd party invoicing service and PayPal.

### Senior Software Developer, SPEEL Prague Ltd

Prague, Czech Republic — Sep. 2007 - Present

<http://www.speel.cz/?lang=en>

My main job in the SPEEL company is developing and maintaining applications for aviation industry. This software is a part of the company's main business - developing and manufacturing [flight data recorders](#) and general avionics. I am part of the small software development team (four members).

Beside the programming itself I spend part of the year abroad, for the purpose of training of end customers in using this software and helping with the integration of the hardware to the aircraft.

### Accomplishments

- Created several specialized desktop applications for debriefing avionics data - <http://www.speel.cz/>
- Participated in maintaining of complex code base - upgrading/improving existing applications.
- Lectured more than sixty people from different countries around the world on site - Pakistan, Rwanda, Thailand, Egypt, Slovenia, Slovakia - <http://flightdiary.net/Cervajz>
- Improved company's versioning system (from none to the subversion) and unification of the code base.
- Participated in on site avionics system integration of different type of aircraft and helicopters such as: C-130 Hercules, Mi-17/24, SA 342, F7-PG, L-410, L-39.

## EDUCATION

### **SOŠ Meziboří (Secondary technical school)**

Maturita (comparable to GCE Advanced Level in UK) - 2005 - 2007

Specialization for electrical engineering. Graduation with Distinction.

### **SOU Krupka (Secondary technical school)**

Certificate of apprenticeship — 2002 - 2005

Specialization for low voltage electronics. Finished by final examination with Distinction.

## OTHER SKILLS

- Pilot license for a paraglider.
- Driving license B and A (active driving since 2005)
- Linux servers administration - installing OS and configuring services such as apache, passenger, mysql, rvm, capistrano, etc.
- Intermediate knowledge of C# and .NET - I developed application connected to MySQL for managing contracts within the SPEEL Prague Ltd.

## HOBBIES

My biggest love is definitely [Paragliding](#). Being up there is magical and I never get tired of it. My other hobbies consist of riding a motorcycles and music generally (Occasionally I play the piano).
